myVidya AI

myVidya AI for School Admins

A school that runs on its own syllabus

One admin app to set up, enrol, check content and protect children’s data

myvidyaai.com

The whole school at a glance

PURPOSE

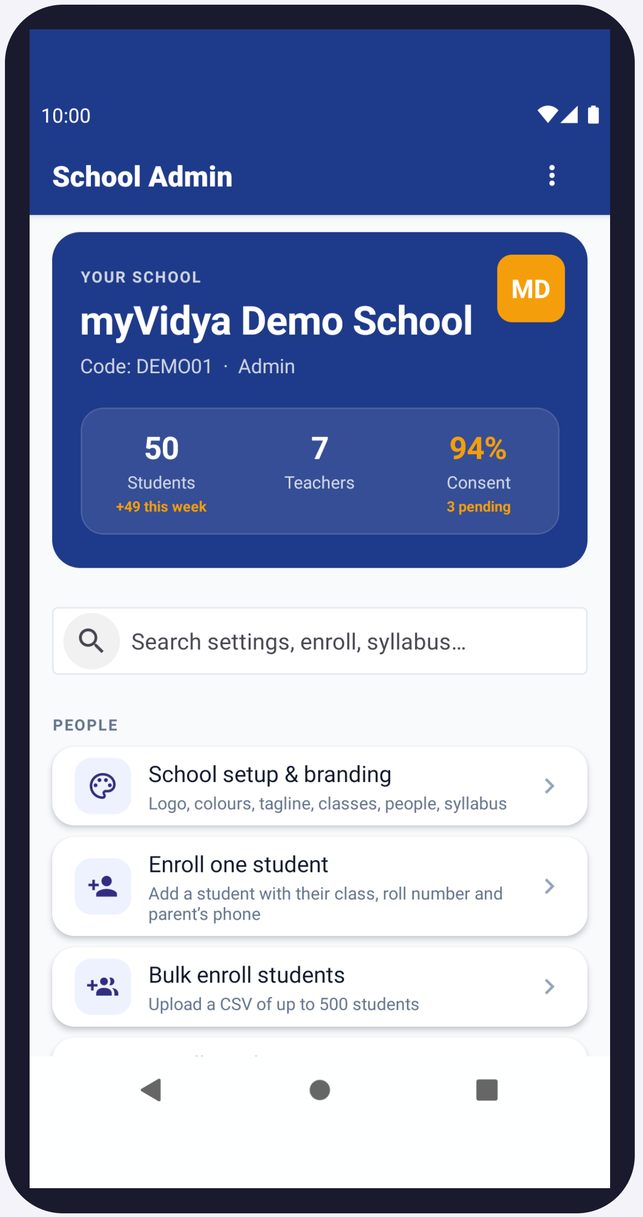

Show the principal, on one screen, who is enrolled, who has consent and what needs action.

HOW IT HELPS LEARNING

Live counts and to-do badges show who is enrolled and consented, so no child is left out.

HOW IT WORKS

1. Sign in with your school email and password.
2. Check students, teachers, consent and to-do badges.
3. Open a tile or search; every admin action is logged.

Set up your school in five steps

PURPOSE

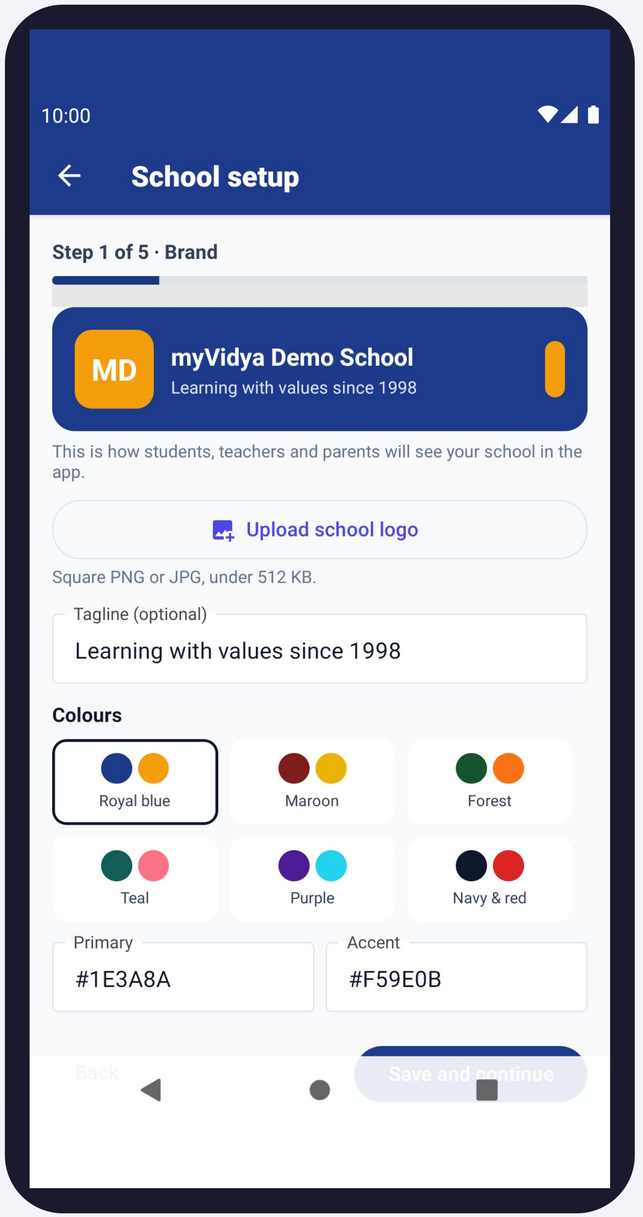

Make the app your school’s own: its brand, classes, people, boards and syllabus.

HOW IT HELPS LEARNING

Students see their school’s name, logo and principal’s message, with textbooks for their board and medium.

HOW IT WORKS

1. Add your logo, colours, tagline and principal’s message.
2. Choose boards (NCERT, TG SCERT, AP SCERT) and mediums.
3. Add classes, import people by CSV, then set the syllabus.

Bring everyone on board

PURPOSE

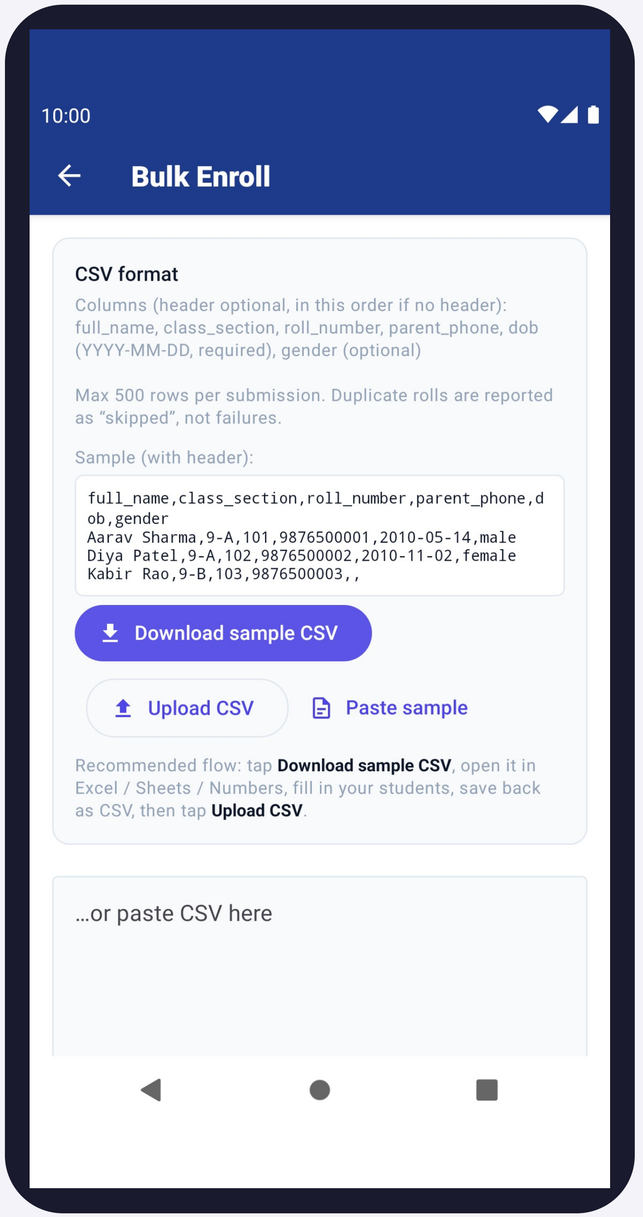

Enrol students, teachers and admins, one by one or by CSV.

HOW IT HELPS LEARNING

Every child gets their own login and progress record, and teachers see their classes from day one.

HOW IT WORKS

1. Download the sample CSV and fill it in.
2. Upload up to 500 students, or a teacher list.
3. Check added and skipped rows; add more admins.

Keep classes organised all year

PURPOSE

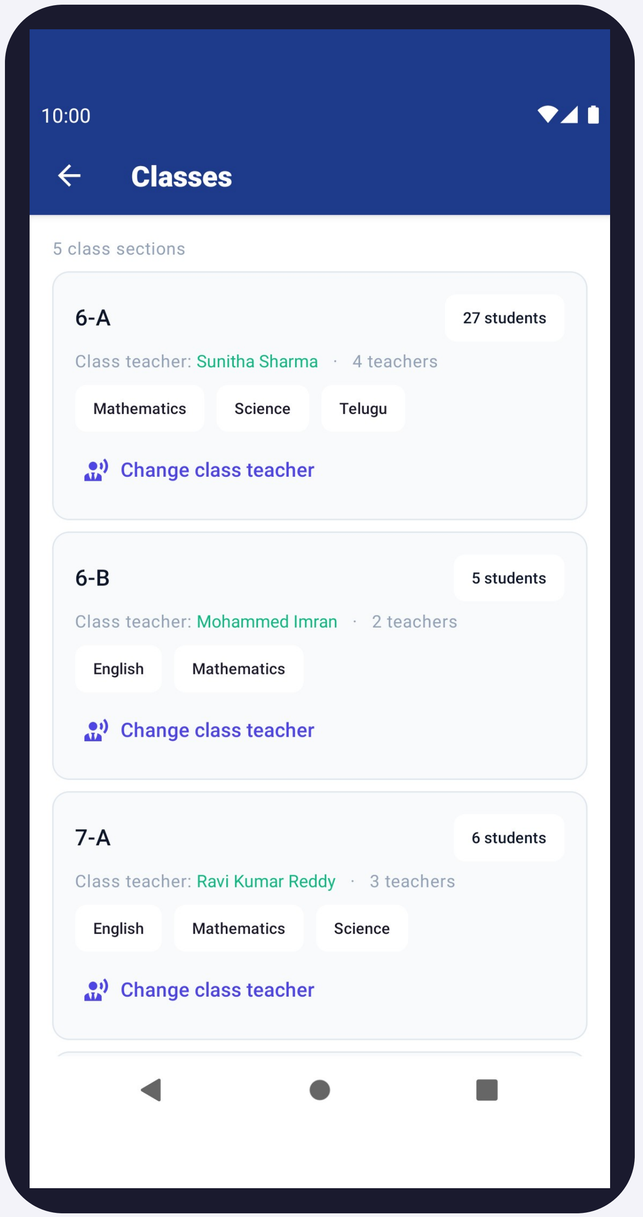

Keep rosters, class teachers and subject teachers right, from the first day to year-end promotion.

HOW IT HELPS LEARNING

Reports and homework reach the right child, and classes keep learning when a teacher is absent.

HOW IT WORKS

1. Find a student or teacher; edit, transfer or reset login.
2. Fix any section flagged with no class teacher.
3. Schedule substitutes; promote students at year-end.

Your own syllabus and textbooks

PURPOSE

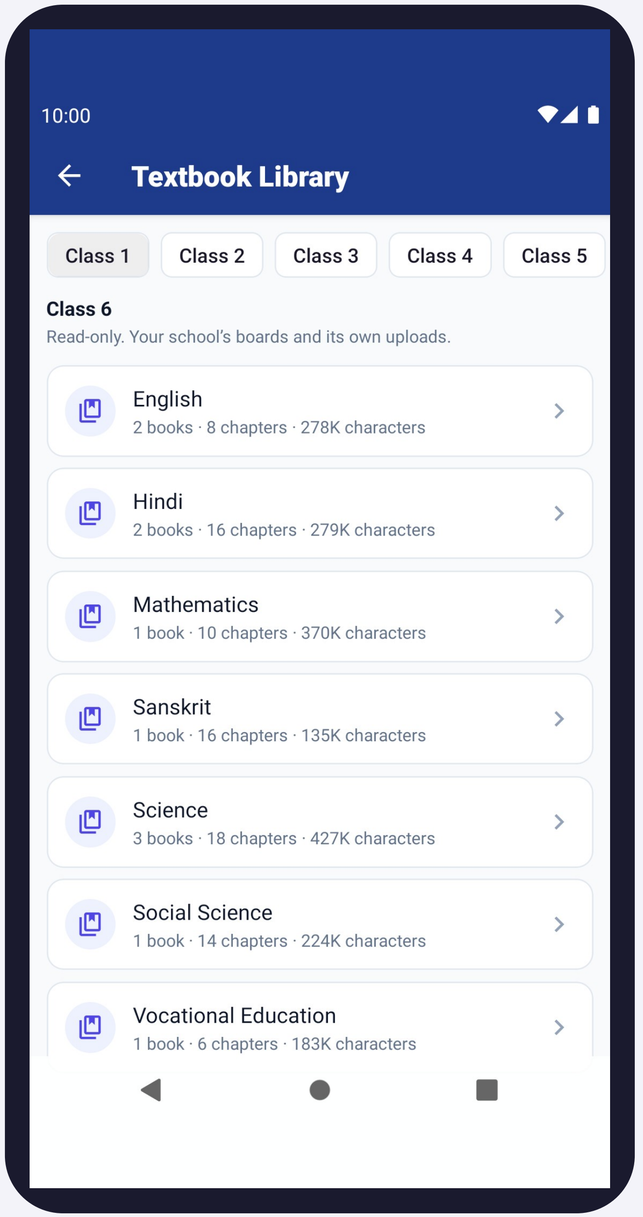

Set the chapters and textbooks your school actually teaches, class by class and subject by subject.

HOW IT HELPS LEARNING

The tutor, quizzes and homework follow the school's own chapters, not a generic course.

HOW IT WORKS

1. Pick a class and subject.
2. Use a board preset or add your own chapters.
3. Attach chapter PDFs; read books in the library.

Only checked content reaches children

PURPOSE

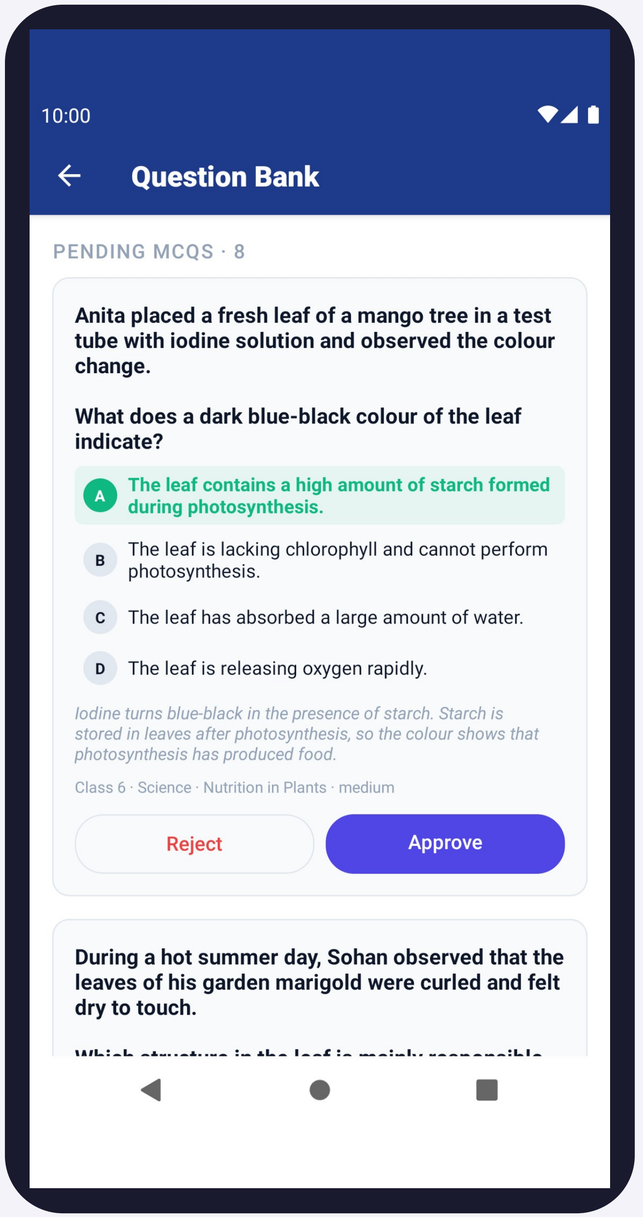

Teachers and admins review chapters, quiz questions and AI answers before students see them.

HOW IT HELPS LEARNING

Children learn and practise only from content the school has checked for accuracy.

HOW IT WORKS

1. Approve or send back chapters and textbooks.
2. Approve or reject teacher-proposed quiz questions.
3. Correct a wrong AI answer once, for every student.

See learning, act early

PURPOSE

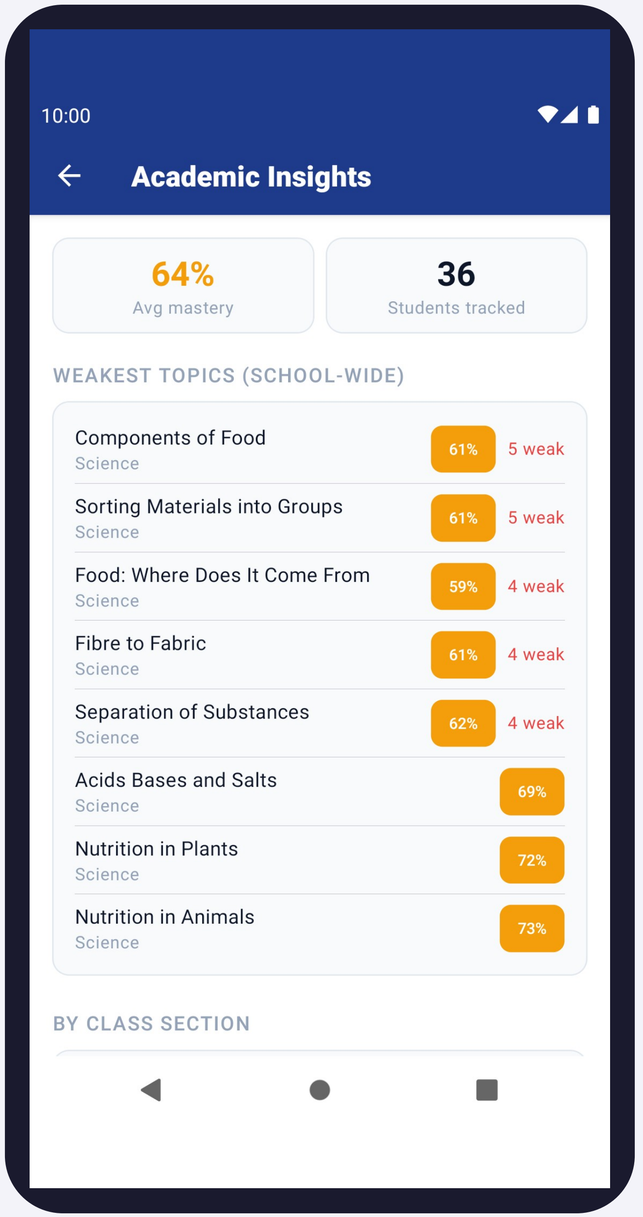

Show where each class stands, topic by topic, from students' quiz work.

HOW IT HELPS LEARNING

Leaders spot weak topics and children who need attention early, while there is time to help.

HOW IT WORKS

1. Students take quizzes in the app.
2. Mastery is recalculated every night.
3. Open Insights to see weak topics and a watch-list.

Safe, local AI

PURPOSE

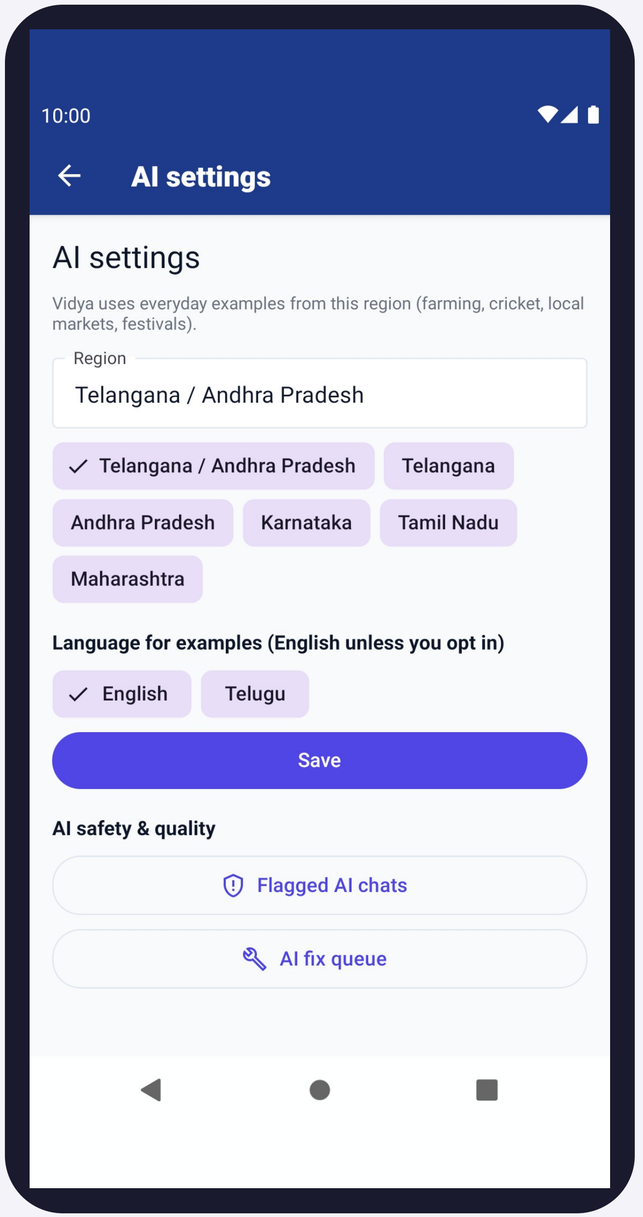

Make AI explanations local and familiar, and keep every student chat safe.

HOW IT HELPS LEARNING

Concepts land better with everyday local examples, and worrying chats reach an adult quickly.

HOW IT WORKS

1. Pick your region, such as Telangana / Andhra Pradesh.
2. Choose English or Telugu for examples.
3. Review flagged chats: mark reviewed or escalate.

The school day in the app

PURPOSE

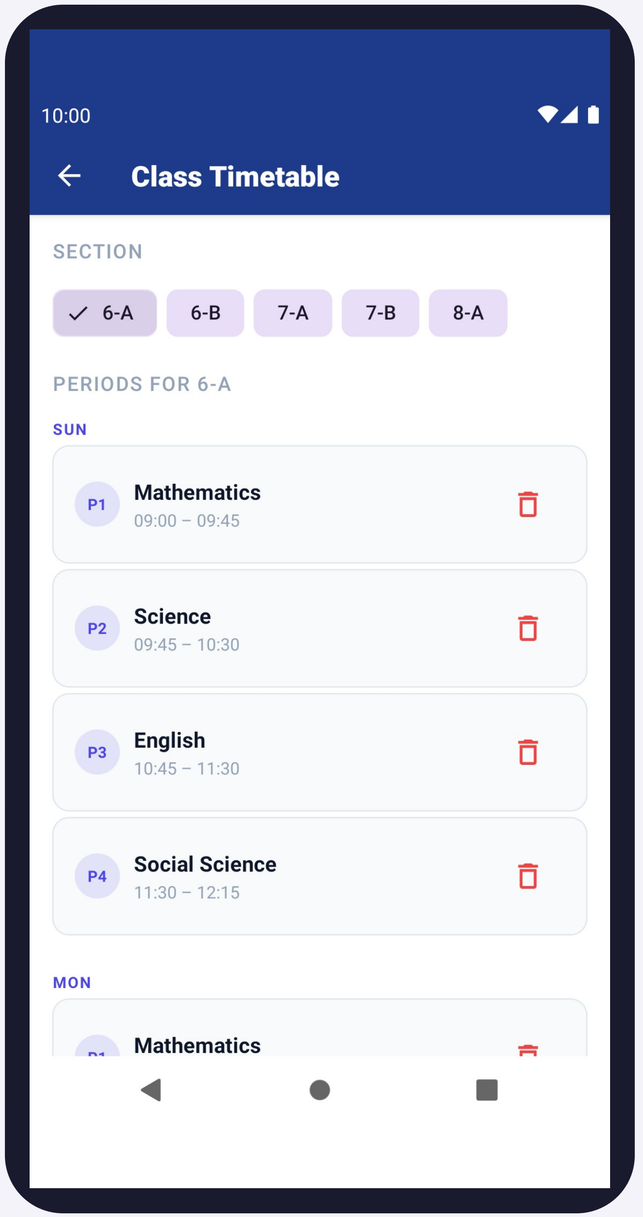

Keep timetables, notices, exam dates and grade scales together, in one place for the whole school.

HOW IT HELPS LEARNING

Study prompts match today’s subjects, and grading stays consistent and fair across classes.

HOW IT WORKS

1. Add each section’s periods to the timetable.
2. Post announcements to everyone or teachers only.
3. Record exam dates; set a default grade scale.

Parent consent and data protection

PURPOSE

Record parent consent and handle children’s data in a way built to comply with India’s DPDP Act.

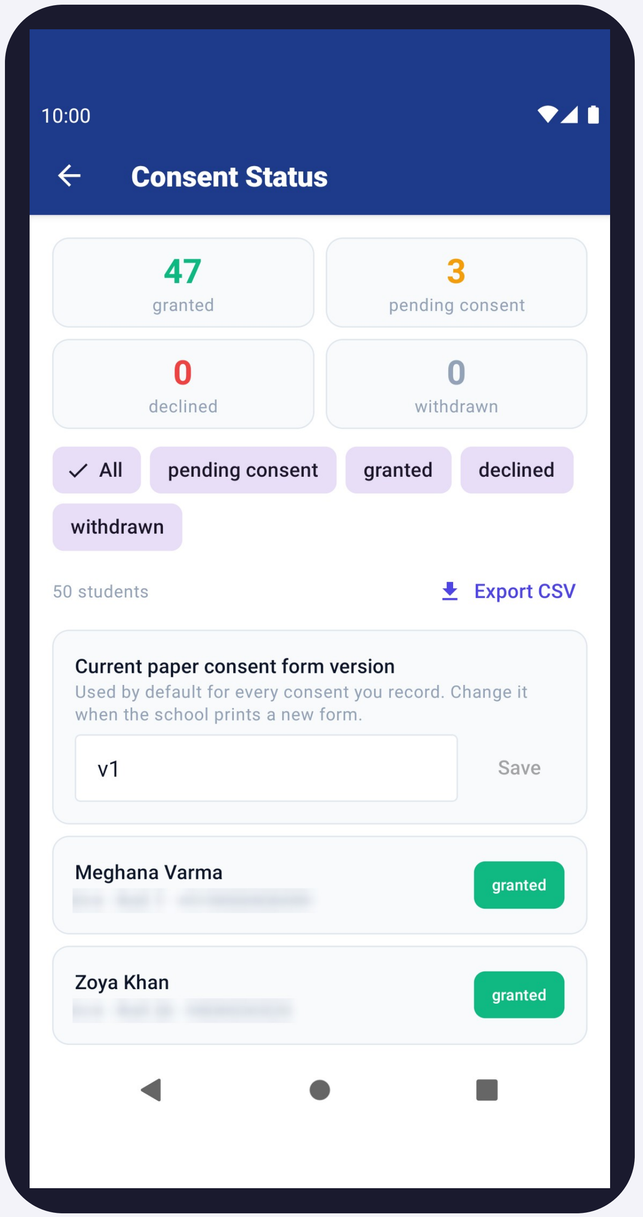

HOW IT HELPS LEARNING

AI features stay off for a student until consent is recorded, so parents can trust the school.

HOW IT WORKS

1. Collect signed paper consent forms from parents.
2. Record consent in the app with the form version.
3. Export or delete a student’s data on request.

Your school’s home page and free website

PURPOSE

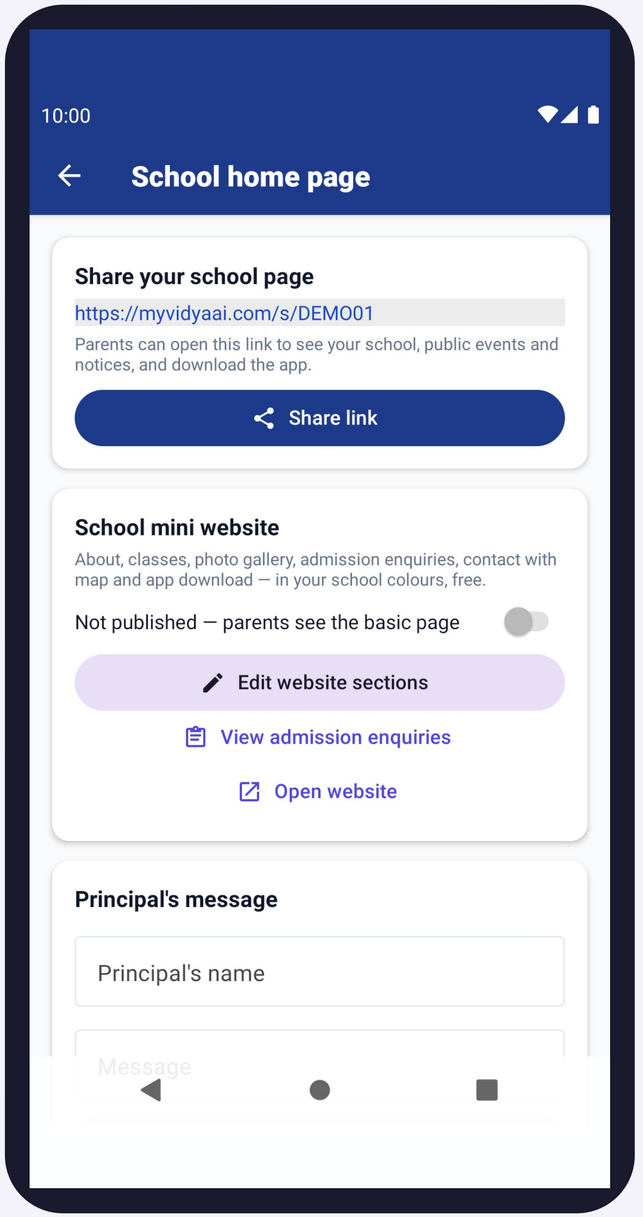

Give parents one place for school news, events, notices and admission enquiries.

HOW IT HELPS LEARNING

Parents stay informed about events and notices, so home and school support learning together.

HOW IT WORKS

1. Write the principal’s message and add events.
2. Edit website sections, then publish when ready.
3. Share your school link with parents.

What the school gains

For students, teachers and parents

One admin app keeps your syllabus, people, content checks and parent consent in one place, so every child learns from what the school has checked.

Your own syllabus, in every lesson

Checked content and safe AI

Consent and data handled with care

myVidya AI

Full transparency for your school

What’s live today and what’s coming

Live today	Coming later (not live yet)
Enrolment, roster, classes and year-end promotion	Parent coin top-ups and payments, announced in advance
Own syllabus, approvals; teachers review all AI output	SMS and WhatsApp reminders
Insights, safe AI, timetable, consent and DPDP tools	WhatsApp parent report (send button is off)
Free daily trial coins for every student	Student exam countdown; web portal deploy unconfirmed
