myVidya AI

myVidya AI for Teachers

Teach every child with a clear view of the class

Homework, marking and class insight from your school’s own textbook. AI drafts, you decide.

Start each day on what needs attention

PURPOSE

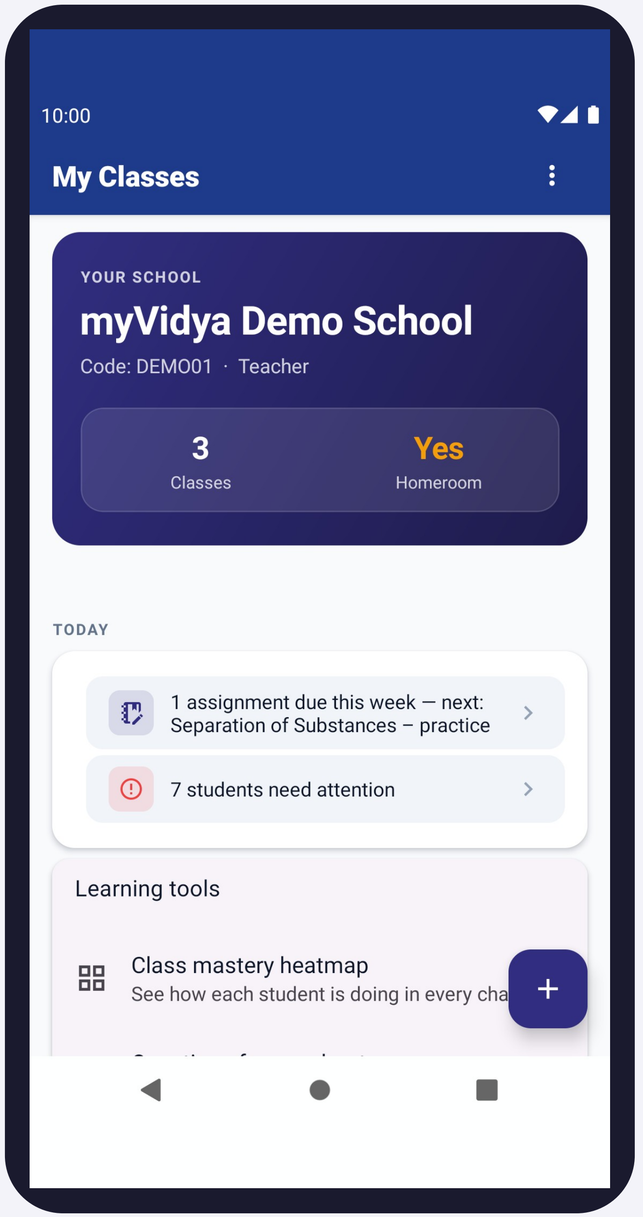

My Classes puts a teacher’s classes, homework and alerts on one home screen.

HOW IT HELPS LEARNING

Due work and students who need attention come first, so no child is missed.

HOW IT WORKS

1. Sign in with school email or mobile, then set your own password.
2. Read Today: homework due and students who need attention.
3. Tap a class to see its mastery, roster and weak topics.

Your school’s textbook, online and approved

PURPOSE

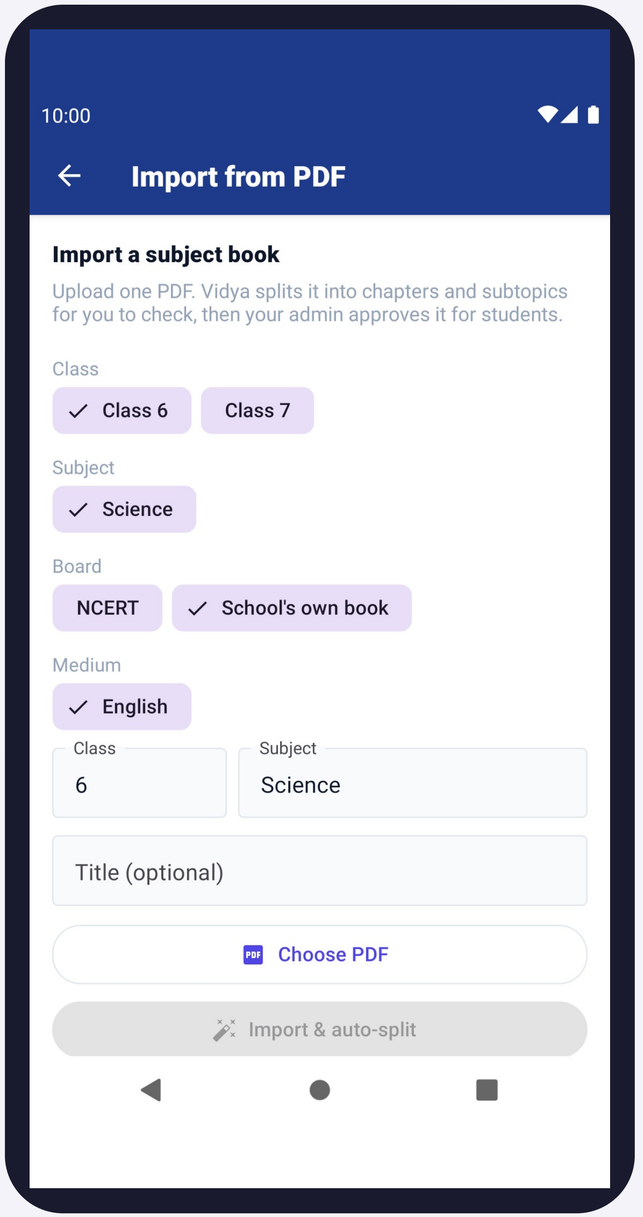

Upload a subject PDF once. Vidya splits it into chapters and subtopics for you to check.

HOW IT HELPS LEARNING

The AI tutor and quizzes work from the exact book your class uses, and students see only approved chapters.

HOW IT WORKS

1. Upload the PDF, tagged by class, subject, board and medium.
2. Review and edit the chapter and subtopic tree.
3. Send it to your admin, who approves it for students.

Homework in three ways, matched to what was taught

PURPOSE

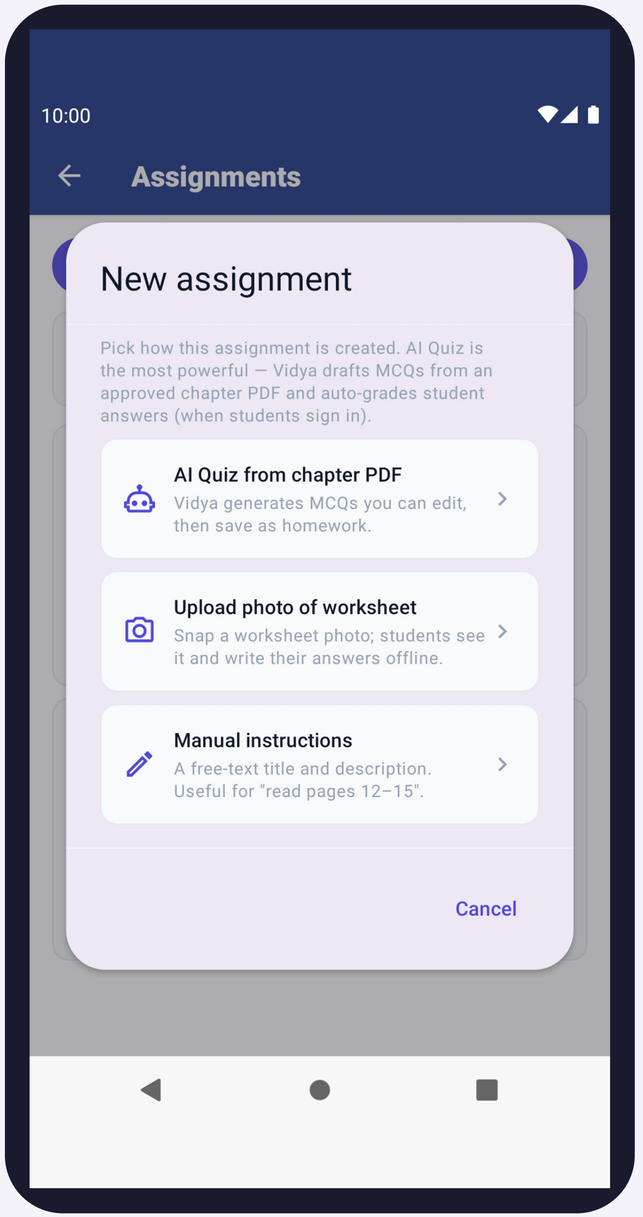

Set homework as an AI quiz from a chapter PDF, a worksheet photo or written instructions.

HOW IT HELPS LEARNING

Homework follows what was taught, and per-student targets mean no child is forgotten.

HOW IT WORKS

1. Tap New assignment.
2. Pick AI quiz, worksheet photo or manual instructions.
3. Choose the students and due date, then assign.

AI drafts the questions, you approve them

PURPOSE

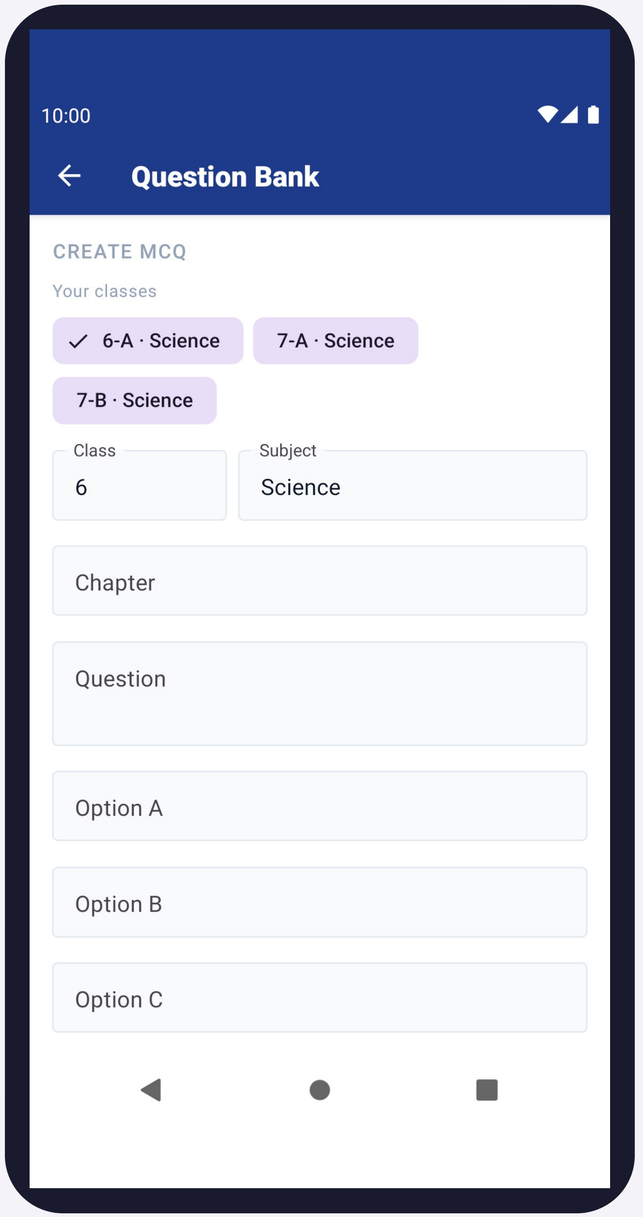

Vidya drafts easy, medium and hard questions from a chapter, or from a photo of a printed paper.

HOW IT HELPS LEARNING

Children practise varied questions at the right level, from their own textbook, in less teacher time.

HOW IT WORKS

1. Pick a chapter, or photograph a question paper.
2. Review and edit the AI drafts.
3. Approve them; bank questions also need admin sign-off.

Faster marking, with the teacher in charge

PURPOSE

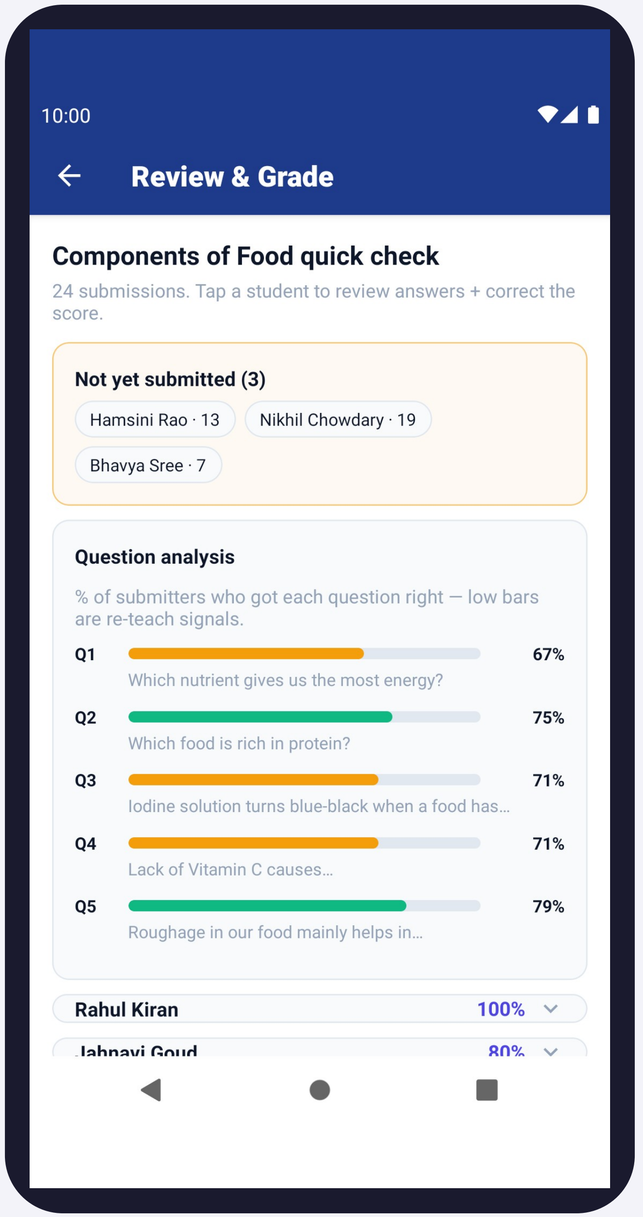

See who submitted, check AI marking and record paper-test marks in one place.

HOW IT HELPS LEARNING

Children get fair, fast feedback, and every mark feeds the same mastery picture.

HOW IT WORKS

1. Open an assignment to see who submitted.
2. Check the AI marking and override any score.
3. Type marks from paper tests and save.

See every student, chapter by chapter, at a glance

PURPOSE

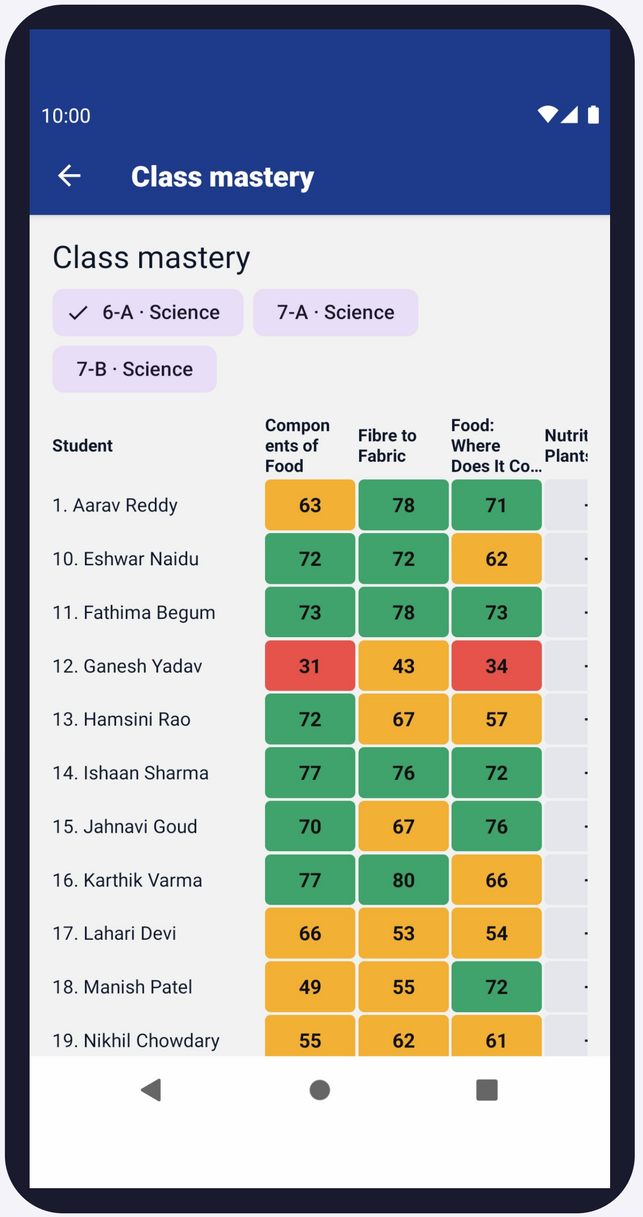

Class detail and the mastery heatmap show every student against every chapter.

HOW IT HELPS LEARNING

Weak chapters and students stand out, so teaching goes where it is needed.

HOW IT WORKS

1. Open a class to see its mastery and weakest topics.
2. Open the heatmap: red, amber and green by chapter.
3. Tap a student or topic to see more.

Notice students who slip, before they fall behind

PURPOSE

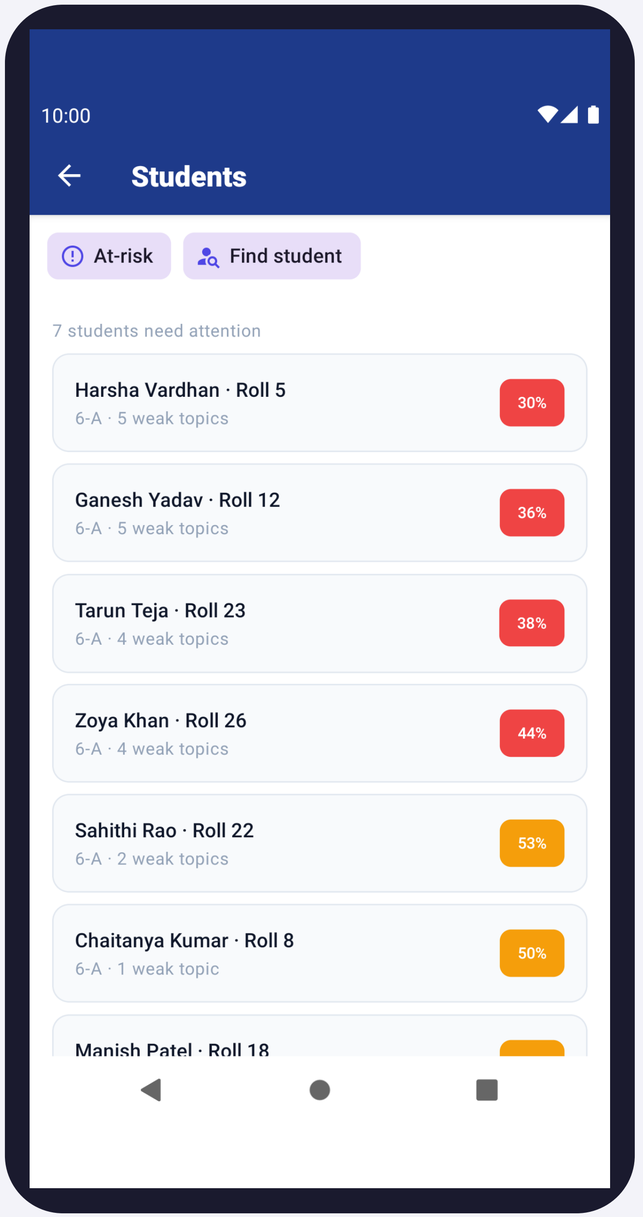

The Students hub lists at-risk children, and early warnings flag drops in mastery or activity.

HOW IT HELPS LEARNING

Teachers step in sooner and can fix why a child goes wrong, not just what.

HOW IT WORKS

1. Get the morning alert, or open Students.
2. See who needs attention and why.
3. Talk to the child or assign a remedial set.

Plan tomorrow’s lesson from the class’s real gaps

PURPOSE

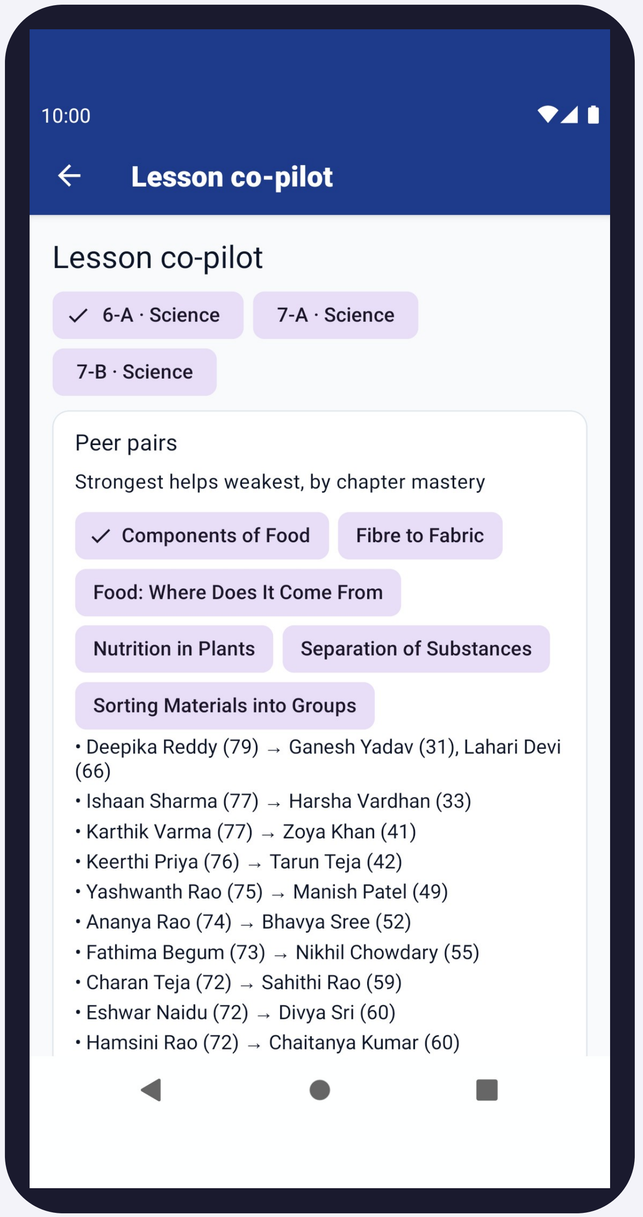

The lesson co-pilot and AI Coach suggest what to reteach, based on class mastery.

HOW IT HELPS LEARNING

Lessons start from real gaps, and AI work covers only what was actually taught.

HOW IT WORKS

1. Pick a class and subject.
2. Review the plan, reteach list, peer pairs and warm-up.
3. Tick taught subtopics in Lesson progress.

Talk to parents with facts, not guesswork

PURPOSE

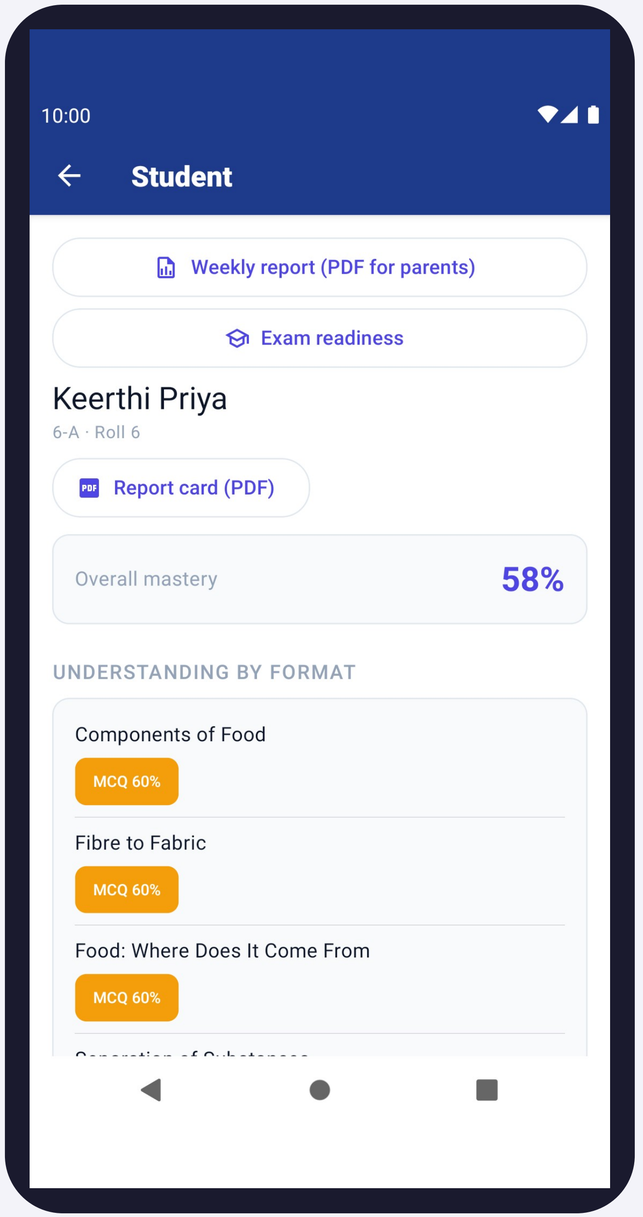

Student detail brings one child’s mastery, assignments and notes together in one view.

HOW IT HELPS LEARNING

Teachers and parents discuss the same clear picture of each child’s progress.

HOW IT WORKS

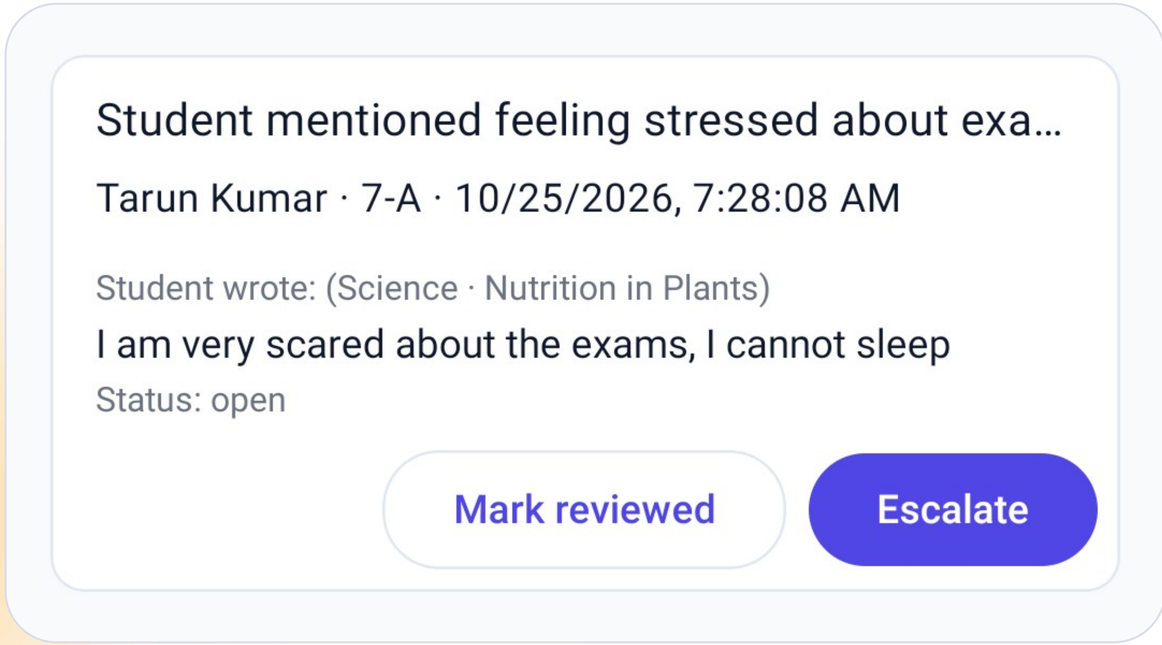

1. Find the student in the Students hub.
2. Read mastery by subtopic and by question format.
3. Open exam readiness, or share the weekly report PDF.

myVidya AI

What teachers gain

Safe AI, with the teacher in control

AI drafts, you approve

Earlier help for students who slip

Safe AI chats, flagged for review

myVidya AI

Full transparency

What’s live today, and what’s next

Live today	Coming next
AI quizzes and marking, always teacher-reviewed	SMS and WhatsApp reminders
Mastery heatmap, early warnings and the lesson co-pilot	Weekly report sent on WhatsApp
Weekly report PDF; free daily trial coins for students	Payment checkout and parent top-ups, announced in advance
